

Nomenclatural novelties : Alexander B. Doweld

**Curvibasidiaceae** Doweld, fam.nov.

**IF550406**

Mycelium with clamp connections. Simple septal pore. Colacosomes not produced. Spherical teliospores germinate, producing a stalked aseptate holobasidium which bent over the stalk when matured. Basidiospores sessile, ovoid to bacilliform, released passively and germinate by budding. Ballistoconidia not formed.

Holotype: *Curvibasidium* Samp. & Golubev 2004.

**Curvibasidiales** Doweld, ord.nov.

**IF550407**

Dimorphic. Simple septal pores. Colacosomes lacking. Holobasidium stalked, curved, aseptate.

Holotype *Curvibasidium* Sampaio & Golubev.
